

Smoke Detector Battery Changes

Firefighters will be in the subdivision between the hours of 8:30 – Noon.

You MUST sign up on the sheets on the Clubhouse bulletin board. They ask that residents try to sign up by development phase. This will allow them to reach more houses.

- Homeowners Responsibilities
 - **Be home between 8:30-Noon on the day you signed up.**
 - Supply 9 Volt batteries
- Firefighters will change the batteries.
- Smoke detectors are recommended to be replaced 10 years after the manufacture date. The date is labeled on the back of the detector. Firefighters DO NOT replace smoke detectors. This is the responsibility of the homeowner.
- Emergency calls and weather may delay the process. If this does happen, we will reschedule.
- Firefighters will be as careful as possible while in your home, but are not responsible for marks a ladder may leave on the wall or dirt on flooring. This is a community assistance program and they do their utmost to take care on your property.
